**Re: North Steamboat Boulevard Power Line Upgrade**

Dear Member,

Yampa Valley Electric Association (YVEA) will be replacing the existing underground power line currently located on or near your property. This project is scheduled to begin around the end of May or beginning of June.

YVEA plans to replace the power line in similar alignment within the existing corridor and right-of-way, with the intent to minimize the construction impact as much as possible. In conjunction with YVEA's upgrade, the City of Steamboat Springs will be re-paving this portion Steamboat Boulevard in 2022. This will allow YVEA to do most work along / in the road; reducing the need to cut & patch or bore driveways.

The work will be performed 'hot', meaning the power will remain on throughout the construction duration. Toward the end of the project, quick rolling outages will be scheduled to make transfers to the upgraded system. You will be notified in advance of these outages, and we will work to make them as short as possible.

If there are any tenants and/or lessees on the property, please inform them of our plans. If you have specific questions or concerns about the project, feel free to call me at (970) 871-2253 or email me at [dtrevithick@yvea.com](mailto:dtrevithick@yvea.com).

Construction updates can be found on our website under the 'My Co-op' tab, Current Construction.

Sincerely,

Yampa Valley Electric Association, Inc.

Dan Trevithick  
Capital Projects Coordinator
